Rimane Osman

Ms. Rimane Osman is a Senior Student at Beirut Arab University, Certified from the Royal Institute of British Architects' RIBA Part One Ms. Osman's perspective has been that the new digital media for Architecture and Design is following TikTok trends and continuity. It trends towards being more informative about updates of Architecture and aimed towards a particular audience and less about the graphic representation and quality that might earn Instagram fame and likes

Internship Starting Date: June 6th, 2022
Internship Completion Date: August 25th, 2022

Key Responsibilities:

- 3D Modeling
- 3D rendering
- Social Media Manager
- Flyers Design

ARCHITECTURAL PROJECTS

MATHER FIELD CAFÉ

Mather Field Café I Sacramento, CA
Project Year: 2022
Project Type: Food/Entertainment
Project Owner: FSA | J. Brooks
Project Valuation: 649,000.00 USD
Project Brief: Mr. Brooks's dream was always to own a coffee shop where he can delight his clients with his exotic coffee blends. He got his eyes on a subway sandwich store that closed during the pandemic having a very distinct location. After several meetings with the architects, the concept was set to serve his country's style while abiding by the envisioned technological development.

Responsibilities:

- Creating Interior Modifications related to a specific concept

ARCHITECTURAL PROJECTS

MATHER FIELD CAFÉ

I worked on the Mather Field Café project creating interior concepts, the concept that I chose is different from traditional small cafes, with intense light effect and cozy sitting through the day and the night.

I’ve learned how to create a certain ambiance through architectural elements. But also I’ve practiced 3d modeling and explored the world of web furniture.

ARCHITECTURAL PROJECTS

STREGER RESIDENCE REMODEL

Project Brief: Steger bought their dream home in August 2021 and they were seeking a remodel of the existing to compliment their contemporary vibrant feel. After a couple of one-on-one design brainstorming sessions, the couple took a decision.

Responsibilities:

- Creating the 3D model, starting with the modeling process on Revit.
- Creating rendered shots on Lumion, both exterior and interior shots.

SOCIAL MEDIA INTERVENTIONS

I worked on posting finalized projects on social media for several weeks, after preparing them into the BTX Instagram posts and story templates.
But also I've managed to modify drafting projects into order to post them in a more interesting and nice way.
I've learned how to visualize shots and to present them in an attractive and artistic way while showing all details.

With this effort given to present the work on Instagram, the profile performance increased by reaching +596% more people.

Facebook & Instagram
I worked on how to present also the projects that I posted on Instagram, but also by posting press releases of the BTX guests with the right hashtags.

Pinterest
I learned how to present all the work accordingly to boards to reach out to many categories.

LinkedIn
I've worked on posting also the projects on LinkedIn with the respective explanation of each project.

TikTok
I worked on presenting TIKTOK videos related to several projects we worked on with their mood boards and plans.

BTX Website
I also managed to post all the projects on site and add the press releases with images and meeting shots.

FLYERS DESIGN

I've also worked on creating many flyers proposals for the company, expanding briefly on what is all about, its location, and how to reach them,

But also what are the services that the company provides.

MEETING WITH GUESTS & PRESENTATIONS

During the course of the internship, we had the opportunity to meet with several guests and each presented his work and a brief about Lebanon, Lebanese architecture, and the company.

Meeting with Mr. Bolden
06/28/2022

I have learned that anyone can make mistakes and learn from them, but also it could be a very positive approach to making things properly, another thing, I have learned from this meeting is that treating people well regardless of someone's status in life is an important factor of success.

Meeting with Mr. Sauma & Mr. Sills
07/03/2022

After the meeting with Mr. Sauma and Mr. Sills, I have learned the types of questions that can be asked to important people and also learn the conversation art from them.
One of the most things that I've learned is to NOT TAKE A NO AS AN ANSWER because life opens lots of opportunities and people must take always the waves in order to survive and reach the success they need.
.

Meeting with Mr. Ahmad Sabra
07/19/2022

I have learned from this meeting:

- How to be a good leader.
- How to enhance our communication skills with those around us.
- The importance to be humble even in a position of power.
- His golden set of rules that he follows and that are applicable and beneficial in any field of work and position.

MEETING WITH GUESTS & PRESENTATIONS

Meeting with Mr. Jreissati
0708/2022

From Minister Jreissaty's meeting, I learned at first that life will always offer lots of challenges. Every one of us will inevitably have difficulties and challenges as we go through life: we will fail tests, not make a team, have a sick friend or family member, and get sick ourselves. As we face life challenges we may find ourselves feeling sad, angry, tense, or anxious, comforted by others and feeling cared for and supported, and maybe even proud of how we have faced or bounced back from the challenge.

Meeting with Mr. Georges Okais
16/08/2022

From this meeting I learned that:

- Everyone should be respected
- Anyone can reach high positions in the work
- Having a passion for something is the key
- There is never one answer for anything
- Hard work always pays off
- Life is full of surprises
- excellent verbal communication skills
- active listening skills.
- to be thorough and pay attention to detail

Meeting with Ambassador Turk
17/08/2022

From this meeting, I thought I might take more information that could be useful for my career, but I didn't. But of course, I learned other stuff just like how to communicate with important people and take ideas from what did they do in their lives and how they managed to reach high positions and build impressive careers and CVs.
But in general, I think it was great thanks to the interaction that happened in the meeting, and I like the fact that we are getting used to communicating and presenting stuff in a professional manner.

CHARITY EVENT

SHEPHERD SCHOOL KIDS LUNCH

On Thursday 18th of August 2022, a lunch was organized at the Shepherd School, for the occasion of the end of summer camp for the children.

As a volunteer for the event of the Kids Lunch at Al Raii School, we managed to create a funny and active ambiance, everything was going great, and we made sure that every child was eating, dancing, and having fun.
The ambiance was great, even the teachers and the administration were dancing and eating and we were thanking them and helping them continuously.

CONCLUSION ABOUT THE INTERNSHIP

During three months of working at Bitarchitects, I have learned a lot of things related to architecture and others that are not.
First, I've learned working in teamwork in a real-life experience is so beneficial to me because it helps how to share information together in the proper manner and network with professionals in the field.
Second, I learned and got so much advice on how to work professionally thanks to daily corrections that are so helpful.
Third, my self-confidence got enhanced and I have managed to gain valuable work experience and continuous self-development.
Fourth, I learned how to manage social media accounts in a professional way and how to deal with audience and analytics.
Finally, I learned and I developed my visual skills as an architect.

Key takeaways and skills gained from the internship

1. I learned how to manage social media accounts in a professional way
2. I developed my presentation skills whether in 3D visualizations and Drafting bundles.
3. I learned more information about interior design.
4. I have learned how hard work is always the key
5. I learned more about 3d modeling while practicing the skill
